Why Are Nigerians Dying So Young?

Welcome

What does the Livewell Report say?

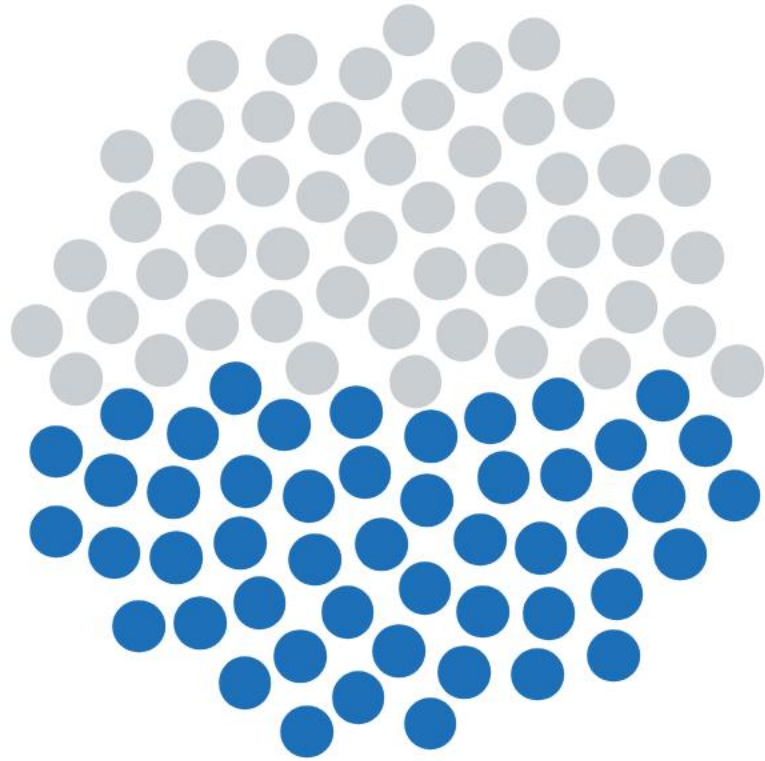

1 in 8

young people live with a long-term illness such as diabetes, hypertension and heart disease.

49%

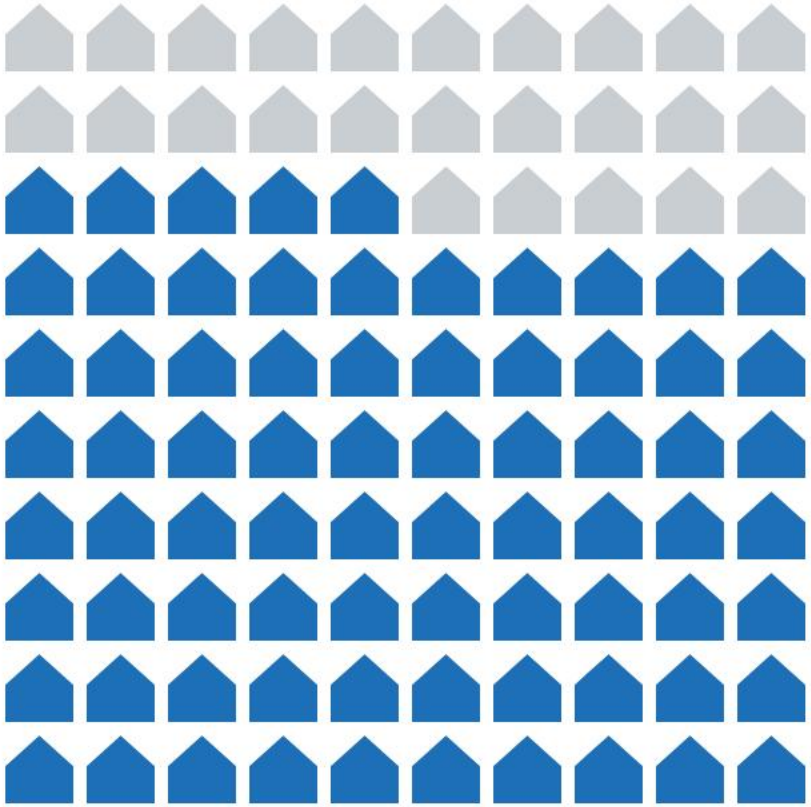

manage a long-term condition, for themselves or a family member.

49
in every 100 households

About 3 in 4

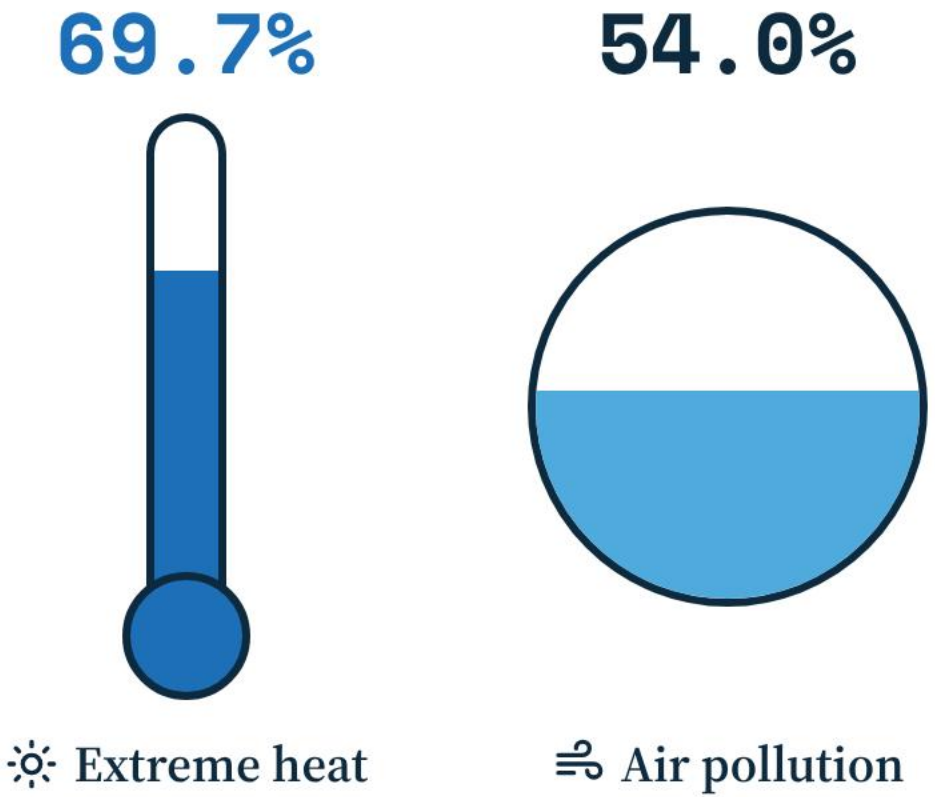

have experienced or witnessed corruption when using public services.

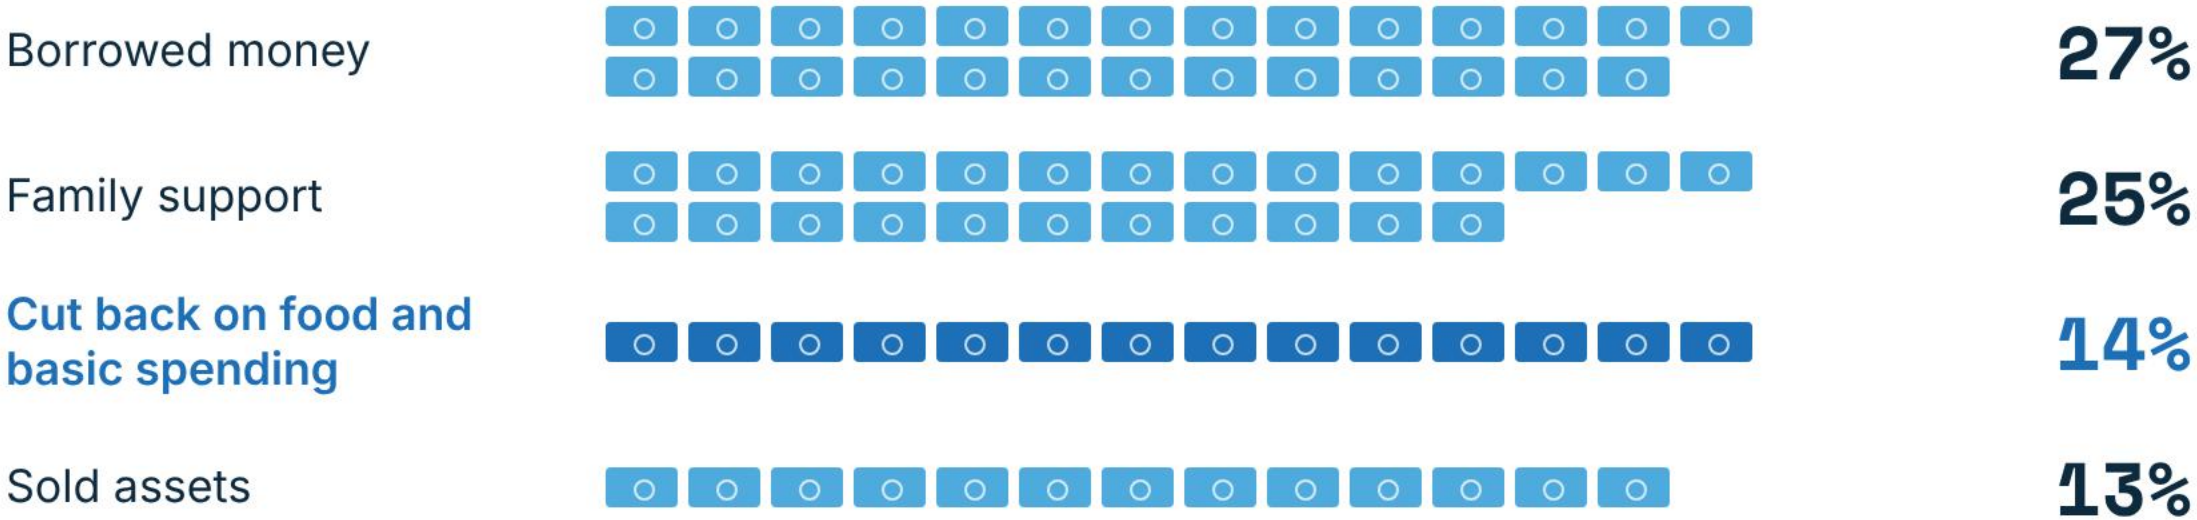

75
in every 100 households

Exposure to environmental hazards increases health vulnerabilities

About 7 in 10 NCD households faced extreme heat, and more than half faced air pollution.

52% have faced financial strain or forgone treatment due to healthcare costs.

How people covered healthcare costs in the past year. Each note is 1 in 100 people surveyed.

We don't have all the answers yet, but this is how we got here.
